

Larger Blackout Blind With Side Rails

BlocOut 80 is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brush seals to the cassette holder and aluminium frames are designed to last, providing added reassurance and flexibility for changing blind fabrics as often as required. BlocOut blinds come in a wide range of colours and patterns to suit all environments.

Curtains trap hot air and prevent it circulating a room. This can lead to heat loss. Bloc Out creates an energy efficient barrier that minimizes heat loss and leaves radiators free to heat a room faster.

Bloc Blinds incorporate a number of specially developed features that make our blinds superior to others on the market. (1) Rubber seals create a barrier between the blind and the window sill, blocking out light and preventing heat loss. (2) Clips are attached to the fabric to ensure the blind stays securely within the runners at all times. (3) The fabric is completely enclosed, reducing fading and significantly extending the life of the fabric. (4) Brush seals offer the highest possible degree of light exclusion and draught prevention.

Product Dimensions

Inside the recess fix

a. Cassette Height	78mm
b. Frame Width	45mm
c. Cassette Depth	86mm

Side rail Depth 25 mm

Outside the recess fix

a. Cassette Height	78mm
b. Frame Width	51mm
c. Cassette Depth	78mm

Side rail depth 15 mm

Product Specification

Size Range	Roller Tube	Aluminium
min width 400mm	Cassette Colour	Anodised Silver / White
min drop 300mm	Bottom Detail	Handle colour to match cassette / Fabric
max width 2400mm	Control	Chain Operation
max drop 2400mm	Chain Options	Silver Metal
	Clutch	32mm / 38mm
	Fabric Position	Standard Roll
	Safety Device	Safety Clip
	Interchangeable Pelmet	Fabric matching pelmet / Contrasting fabric pelmet

Operation, Care and Maintenance

Operation

The larger dimensions of this blind mean that it needs to be operated by a traditional chain system. Fully compliant with all relevant child safety standards, the chain is secured to the wall, preventing it from coming loose and becoming a choking hazard.

Care Instructions

We are all very proud of our stunning BlocOut blind range. To keep them looking their best for years to come, always ensure that your BlocOut blinds have been securely fitted, use a synthetic or feather duster and refrain from using soap and water. Should any part of the blind fail contact our dedicated Customer Service team who can help.

Maintenance

All our BlocOut blind components are manufactured using aluminium and glass reinforced nylon. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blind's working life. Manufacturing and installation guidelines for the size restrictions for each type of installation are included in this specified brochure.

Child Safety

It only takes a moment for a child to find themselves in danger when loops or cords are involved. With this blind, we have included a wall secure system that keeps the cord from coming loose and becoming a danger.
